ATTENDANCE ENTRANCE CONTROL SOLUTION

Attendance Entrance Control Solution

ZKTeco's attendance entrance control solution is humanized . Our survey found that many employees habitually leave the company and forget to punch. ZKTeco helps these companies better manage attendance, and also helps companies' entrance control management.

- Standard entrance management
- Humanized attendance management
- Convenient attendance statistics

- Entrance control management and attendance management organic combination

Entrance control products are equipped with attendance machines and are integrated into the company's entrance management which make it more humanized. With the most advanced biometric technology, attendances are made in a convenient way.

ZKTeco Biometric Verification Technologies include fingerprint, face and finger vein verifications. These technologies ensure access for authorized persons only to achieve high-level security environment, and also the authenticity and preciseness of attendance data.

Transfer data

Once a person's access record is collected, it will be automatically delivered from the device to the software real-time.

Manage data

ZKTeco software is powerful and easy to use, which lets you review attendance data in real time to manage your company's attendance data effectively.

Advanced time attendance

Employees no longer need to punch at attendance machine, because when a person passes the gate, the first record and the last record will become the effective attendance data. So employees never worry about forgetting to punch, and this method also prevents surrogate attendance takings.

High quality user experience

The integration of time and attendance and access control equipment enables higher security ability of the entrance control products. With high durability and price advantage, our products are appreciated by the majority of customers.

Applied to a variety of places

ZKTeco's entrance control system is designed to create a secure environment, whether it is entering the company, government, factory, prison has a higher level of security, our company can meet different needs according to different customers.

Gain comprehensive workforce reporting on employee attendance

Humanized attendance management

ZKTeco's Time & Attendance simplifies the tedious tasks involved in monitoring employee time and attendance, labor tracking, and data collection. Our completely automated time-tracking software — working in tandem with our data collection devices — helps you to control labor costs, minimize compliance risk, and improve workforce productivity.

Instead of spending hours shuffling around spreadsheets and time cards every week, HR can easily send employee clocking at data directly from the system to the payroll software. Ensure compliance with employees with different pay structures, including union, hourly and salaried employees.
